

# Fencing

Outdoor Events - Construction Sites - Wayfinding

Fencing is a customizable and bold way to advertise events, display sponsorship signage, create wayfinding or even covering unsightly areas during construction. Due to the size of these banners, your message can be extremely effective and it can have even more impact when used in multiples.

Fencing is typically printed on mesh, and we have many fabrics to choose from. Mesh is ideal because it has tiny vents allowing wind to blow through which is important when covering such a large stationary area.

## SPECIFICATIONS

- Printed on Mesh polyester.
- Finished to your size.
- Image shows from both sides (single face reverse)
- Usually grommeted every 2' and attached with tie wraps.

## OPTIONS

- Ask about printing on vinyl mesh!
