

Titan Telescoping Flagpole

All the headaches associated with replacing the rope, fixing the pulley, or adding an ornament to the top of the flagpole are eliminated with a telescopic flagpole!

ABOUT THE POLE

- Gold ball topper, ground sleeve (ABS plastic), and easy to follow installation instructions.
- Maintenance free, high strength 6105-T5 anodized aluminum tubes.
- Patented interlocking sleeve mechanism makes it easy to extend and retract the pole, and provide extreme joint stability.
- Swivel ring clips allow flags to fly freely 360 degrees around the pole, reducing flag wrapping or tangling. Pole comes preassembled and ready to extend.
- Limited lifetime warranty.

Flagpole Specs:

15' & 20'LT – Base is 2.5", with 14 gauge wall thickness. Has 3 sections (2 joints). Wind rating of 75 mph. Installed heights are 15' & 18.5' respectively.

20' & 25' – Base is 3.0", with 12 gauge wall thickness. Has 4 sections (3 joints). Wind rating of 95 mph. Installed heights are 20' & 25', respectively.
